Subject: West Lake Landfill CERCLA Site

Alyse,

It appears MDNR is out collecting some kind of offsite field rad data, and plans to publish a report:

Recent Activities

Data collection for the West Lake Vicinity Report was conducted during the week beginning November 1. The report, comprised of an interim report and the final laboratory analysis, will be available in the near future.

<http://dnr.mo.gov/bridgeton/>

We were never advised of these data collection efforts or the proposed report, and learned

of it only by happenstance when Brian Power came upon some work being done by the MDNR Federal Facilities Unit and others.

Can you please provide us information and the documents regarding this effort? I make the request under FOIA, but hope we can work more quickly and informally than that.

The PRPs should have been apprised of this effort before it occurred, I should think, in order to offer to perform it, as the AOC provides, or at least to observe and split samples, especially if MDNR will seek the cost from them under the oversight agreement. This is a surprise and still a mystery to us. Thanks.

Regards, Bill
